Re: FY2024 Compliance Review -- Audit Evidence Packet Request
Matter No. HLG-2024-118

Dear Ms. Okafor,

As part of our FY2024 compliance review, please assemble a single PDF audit packet and deliver it as packet/audit_packet.pdf. The packet must contain the tabs below, in order A through D. Within each tab, include exactly the pages listed, in the listed order. Do not include any other pages or documents. Source documents are in records/; use matter_file/registers.csv to identify the correct source file for each referenced party or item.

Tab A -- Consulting services agreement with Northstar Analytics LLC (Contract No. GL-2204): include the executed signature page, followed by Schedule 1 (fee schedule). Include no other pages of the agreement.

Tab B -- Agentfield Commercial policy AGF-88231: include the Declarations page, followed by the page bearing Section III (Exclusions). Include no other pages of the policy.

Matter No. HLG-2024-118 (page 2 of 2)

Tab C -- Q3 2024 bank reconciliation, operating account 4471: include the reconciliation summary page, followed by the outstanding-checks detail page. Include no other pages of the reconciliation.

Tab D -- The fully executed engagement letter with Vaughn & Holt LLP for this matter, in its entirety, including appendices and attachments. A draft version also circulates internally; draft versions must not be included.

Important: some of the scanned pages in the shared drive came through sideways or upside-down. Every page in the assembled packet must be upright -- no rotated pages.

Please also compile a tab index as `packet/packet_index.csv` using the exact column layout of `matter_file/index_template.csv`. All page numbers are counted from 1 (human convention). The `source_pages` column lists the source document's pages in the order they are included, separated by semicolons. The `packet_page_range` column gives the inclusive range of that tab within the assembled packet (e.g., 1-2). The last row must be a TOTAL row whose `page_count` column gives the whole packet's page count.

Finally, draft a short cover memo as `packet/cover_memo.md` addressed to our engagement team. It must state the matter number, list the items included by tab with their page counts, give the packet's total page count, and note the Q3 adjusted bank balance shown on the reconciliation summary (our workpaper WP-7 ties to that figure). Please also flag any anomalies you encountered while assembling the packet.

Thank you,
R. Ellery, Senior Manager, Crowe & Pelley LLP
